$ASTY

ARBSTRATEGY FAQ

1. WHAT IS "THE ASTY EFFECT"?

THE ASTY EFFECT DESCRIBES THE SELF-REINFORCING SYSTEM DYNAMIC BEHIND ARBSTRATEGY.

- TRADING ACTIVITY GENERATES REVENUE THROUGH THE 1% FEE
- FEES ARE AUTOMATICALLY ALLOCATED TO BURN, REINVESTMENT AND TREASURY
- THE BURN REDUCES CIRCULATING SUPPLY
- REINVESTMENT INCREASES CAPITAL EFFICIENCY AND REVENUE POTENTIAL
- THE TREASURY STRENGTHENS STRATEGIC FLEXIBILITY

VOLUME STRENGTHENS THE SYSTEM.
EFFICIENCY INCREASES REVENUE.
REVENUE ENHANCES STABILITY.

THIS CONTINUOUS CYCLE IS THE ASTY EFFECT.

2. WHAT IS THE 1% TRANSACTION?

A FIXED 1% TRANSACTION FEE APPLIES TO:

- BUY TRANSACTIONS
- SELL TRANSACTIONS
- WALLET-TO-WALLET TRANSFERS

EVERY ON-CHAIN ASTY TRANSACTION CONTRIBUTES TO THE SYSTEM.

3. HOW ARE THE COLLECTED FEES ALLOCATED?

ALL COLLECTED FEES ARE DISTRIBUTED AS FOLLOWS:

- 40% PERMANENTLY BURNED
- 40% ALLOCATED TO THE GROWTH WALLET
- 20% IMMEDIATELY SWAPPED INTO SOL OR USDC AND STORED AS TREASURY RESERVE

THIS STRUCTURE IS FIXED AND TRANSPARENT.

4. WHAT DOES THE 40% BURN ACHIEVE?

- THE BURN PERMANENTLY REDUCES CIRCULATING SUPPLY
- HIGHER TRADING VOLUME LEADS TO A HIGHER BURN RATE
- ASTY IS STRUCTURALLY DEFLATIONARY

5. WHAT IS THE GROWTH WALLET USED FOR?

- FUNDS PERFORMANCE-BASED LIQUIDITY REINVESTMENTS
- CAPITAL FLOWS INTO HIGH-EFFICIENCY POOLS
- LOW-EFFICIENCY POOLS ARE NOT EXPANDED

6. WHY IS 20% SWAPPED INTO SOL OR USDC?

THE TREASURY IS INTENTIONALLY HELD IN EXTERNAL ASSETS TO:

- INCREASE SYSTEM RESILIENCE
- ENABLE STRATEGIC FLEXIBILITY
- SUPPORT LIQUIDITY WHEN NECESSARY
- FUND SELECTIVE BUYBACK AND BURN EVENTS

TREASURY DEPLOYMENT IS STRATEGIC, NOT AUTOMATIC.

7. CAN THE TREASURY BE USED FOR BUYBACK AND BURN?

- YES, SELECTIVELY DEPENDING ON MARKET CONDITIONS AND STRATEGIC EVALUATION
- THERE IS NO FORCED OR ALGORITHMIC DEPLOYMENT

8. IS ASTY INFLATIONARY?

- NO
- 40% OF EVERY TRANSACTION FEE IS PERMANENTLY REMOVED FROM CIRCULATION
- ASTY IS STRUCTURALLY DEFLATIONARY

9. HOW DOES TRADING ACTIVITY AFFECT ASTY?

- INCREASED BURN
- HIGHER REINVESTMENT CAPACITY
- FASTER TREASURY GROWTH

ACTIVITY DIRECTLY STRENGTHENS THE ECOSYSTEM.

10. HOW DOES CAPITAL ALLOCATION WORK?

- POOLS ARE MEASURED RELATIVE TO TOP-PERFORMING BENCHMARKS
- CAPITAL IS CATEGORIZED INTO EFFICIENCY TIERS
- LOW-EFFICIENCY POOLS ARE NOT EXPANDED
- CAPITAL FOLLOWS MEASURABLE PERFORMANCE, NOT SPECULATION

11. WHO GOVERNS MAJOR DECISIONS?

- THE CORE TEAM PROPOSES MAJOR CHANGES
- THE COMMUNITY VOTES VIA TELEGRAM BEFORE EXECUTION

STRUCTURED OVERSIGHT MEETS DECENTRALIZED PARTICIPATION.
